

The features that will be tested are Login, Sign up, and Accessing the flights page.

Sign Up: Creates an account with a new email and password, and then logs in to ensure that the account creation feature is working as intended.

Login: Attempts to log in with the account that was just created previously in order to ensure this feature is working as expected.

Flights Page Access: Script navigates to the '/flights' page through the 'Book Now' button in order to make sure that the user can access the intended pages once logged in.

Test output below:

A terminal window with a dark background and light blue text. The prompt is '(venv) (base) Mac:Assignment-6 danieldavids\$'. The command 'python e2e_test.py' has been executed, resulting in three lines of output: 'Sign Up Successful', 'Login Successful', and 'Flights Page Loaded'.

```
(venv) (base) Mac:Assignment-6 danieldavids$ python e2e_test.py
Sign Up Successful
Login Successful
Flights Page Loaded
```

How to run:

1. Load the repository
2. Make sure there are two terminals running
3. Launch the website locally with "python3 app/app.py" in the first terminal
4. In the second terminal, change directories to "Assignment-6"
5. Run "e2e_test.py"
6. Expected output screenshot posted previously

Task Distribution:

Daniel - Tests and Script Creation (33%)

Ethan - Tests and Script Creation (33%)

Kareem - Tests and Script Creation (33%)
